Professional Summary

Data Analyst with hands-on internship experience in SQL, Python, Power BI, and Excel. Skilled in data cleaning, exploratory data analysis, dashboard development, KPI reporting, and transforming business requirements into actionable insights. Experienced in analyzing datasets, validating data quality, and delivering actionable insights to support business decision-making.

Experience

Data Analyst Intern

Aug 2025 – May 2026

NXTDC Data Center & Cloud Services Pvt. Ltd.

Hyderabad, India

- Built interactive Power BI dashboards and KPI reports to monitor operational performance, utilization metrics, and business outcomes.
- Analyzed operational datasets using SQL and Excel to identify trends, generate actionable insights, and support business decision-making processes.
- Performed data cleaning, transformation, and validation to improve data quality and reporting accuracy across multiple sources.
- Automated reporting workflows using Python, SQL, and Excel, reducing manual effort and improving reporting efficiency.

Technical Skills

Languages: SQL, Python

Data Analytics & BI: Power BI, Microsoft Excel, DAX, Power Query, Dashboard Development, Data Visualization, KPI Reporting, Business Intelligence

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn

Analytics Concepts: Data Cleaning, Data Validation, Data Transformation, Exploratory Data Analysis (EDA), KPI Analysis, Statistical Analysis, Business Insights, Requirements Analysis

Infrastructure & Cloud Fundamentals: Linux Fundamentals, Networking Fundamentals, TCP/IP, DNS, DHCP, Virtualization Concepts, Virtual Machines, VMware Basics, Cloud Fundamentals

Tools: Jupyter Notebook, Git, GitHub, Jira, VS Code, Google Workspace

Projects

Retail Sales & Customer Behavior Analytics 📊 | Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, MS Excel

- Analyzed 264K+ retail transactions using Python to identify customer purchasing behavior, sales trends, product performance, and business opportunities.
- Performed data cleaning, preprocessing, and feature engineering using Python (Pandas, NumPy).
- Conducted exploratory data analysis (EDA) to uncover customer segments and purchasing patterns.
- Created visualizations and analytical reports to support business decision-making.

Website Performance Analytics Dashboard 📊 | Tools: Power BI, DAX, Power Query

- Designed an interactive Power BI dashboard to analyze website traffic, user engagement, and conversion performance metrics.
- Created KPI reports and dynamic visualizations to monitor sessions, users, bounce rates, and conversion trends.
- Utilised Power Query for data extraction, transformation, and preparation from structured datasets.
- Implemented DAX measures to support advanced reporting and performance analysis.

Education

JNTUH College of Engineering

2021 – 2025

Bachelor of Technology in Electronics and Communication Engineering (ECE)

CGPA: 7.97 / 10

Certifications

- **Power BI Certificate** – OfficeMaster (2025)
- **Deloitte Data Analytics Virtual Experience** – Forage (2025)
- **Data Analysis with Python** – freeCodeCamp (2023)
